System Implementation
Demo: 5/6/22**

https://github.com/TA22celica/SystemImplementation

System Requirements

Server Requirements (X2):
- Processor -Dual Core Intel Core or Higher
- RAM - 8GB+
- HDD - 40 GB+

Client Requirements:
- Web Browser – Latest Version of Google Chrome, Internet Explorer, Internet Edge or Firefox.
- Internet Speed 50mbps+ recommended
- CPU: Core i5+
- RAM: 4GB+
- Storage: 256GB

How Does it Work?

This web solution is accessed by customers and administrators through a URL hosted by a webserver with mySQL database backend.

Core Functionality

- Process customer purchases
- Customer account creation
- Product Reviews
- Product ratings

Additional Features

- Easy-to-use, familiar order processing for customers
- Key performance indicators built into the admin dashboard
